

Paris (s.)-Rose Miles-Brenden

## Group

She is real.

I am innocently provided.

The case is closed.

I have my ring, and Jake, a promise.

Never Forget.... this much is the key to memory and epistemology derived from-logic.

I have the key to suffering.

Post my innocence or *no wrong doing* incarnate....

There is four month(s) - *to this moment (7:40-41)* - to decide on a relationship. Love?

I will be studying two given(s) and two proposition(s).

- I.) Painleve and Burger's Equation - at an Elliptic group - via a Lie Algebra and percolation.
- II.) The limitation of topological assembly, percolative model(s) and Statistics of group and taxonomies.
- a.) Law and it's Inheritance.
- b.) Ecology, Medicine, Sociology, and Branches of Knowledge & Science.

My Hobby just-shifted to writing of my promises, ideas on articles, and of the book, and studies [as above], and of the program.

Programming, and that of ACT, a Job, and the Device, have become primary, and I understand what was 'good' about my year(s) with Dusti. I remain happy, and confident, although, somewhat a subconscious forward looking positively held happiness. I remain to come upon where I will, and am John the Baptist, Jacob, Moses, and Yichud, and Paris.

Taxonomy, *to-which* a 'hypothetical' **pen-adonizer** and **trichorder** and **lithmus test** can taxonomically integrate to-specialty at the database of genological **\*life**, and *of the person and their chemical dating* **and breakdown for of a hologram** can identify health conditional assumptions, and revolutionize medicine.

Consider leap-ahead and leap-back, and the round trip, the relative shift, and the 'back-track' and 'ffwd-track', at social dispute.

Three-body problem? There *is in fact a resolution*,... at Incompletion-Completion, but\* of hume(s) fork on local to eventual-global medical record foundation.

Clustering of numeric relationships for in rolling Platonic-Solid(s) & more advanced Johnson Solid(s), that of the graph-appropriateness, and of the inclusion and exclusion into new-group(s) at FCT, - and the 'orientability' from-bias....

\*\*\* *Incompletion and Completion, Law and Science and Ecology and Medicine* - whether our number-system is in **\*Question**.
